[FAIL] #A11 Remove Lovable / AI footprints

vite-tanstack-config dep, lovable-error-reporting.ts, AGENTS.md, README Lovable sections,

bumfig excludes, reportLovableError in __root.tsx.

Notes

- Both apps still ship Lovable toolchain (@lovable.dev/vite-tanstack-config, lovable-error-reporting, AGENTS.md, Lovable README boilerplate).

- Gov homepage has no H1 (only h2 SectionTitle) despite prior Infelo AFTER claiming PASS.
- Manpower static sitemap missing /methodology, /ethical-recruitment, /demands, /gallery, /careers.
- Favicon.ico missing on both sites (head links to /favicon.ico).
- AI/prompt provenance text remains in READMEs (clone prompts / Lovable marketing).
- CSR/SPA residual: crawlers get shell HTML; route meta depends on client head injection unless prerendered.
